What is Neurodiversity?

B
G

Imagine if ASD was described like types of cupcakes.
You have some with icing, some with sprinkles, some chocolate, some vanilla but they're all cupcakes.

"But how cupcake is it?"

"What?"

"Like is it a little bit cupcake or severely cupcake?"

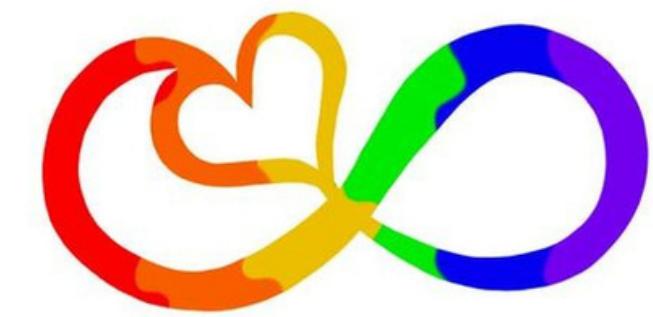

"It...it doesn't work like that..."

#autism #neurodiverse #ASD

Awareness
Respect &
Responsibility

We all think differently
