At the first annual Global Hope Conference, Mrs. Manzanal-Frank spoke eloquently on the topic of the business model reset during the time of COVID. The presentation was excellent, highlighting some of the key issues about business evolution in the modern age. The speech walked the listener through the need for more developed businesses as we move away from the 'classic' model toward a model that integrates the diversity of thought, technology, and promise of the modern era.

"I appreciated how Maiden's presentation was really custom tailored to our members. The topics of resilience and building back better were good ones, and her presentation materials were clear and easy to follow. I really liked her diagrams! Some more specific case study examples would be nice to bring the concepts from abstract to concrete. I also really appreciated the global lens."

Studio Administrator, Skye Louis

"Maiden gave a great presentation to our community of changemakers which includes students, faculty, social entrepreneurs, board members, and members of not-for-profit organizations. She broke down ideas and concepts in a way that captured the attention of the participating audience, and answered questions in a well thought out and professional manner. Her presentation sparked many ideas and raised insightful questions which led to a meaningful discussion on resiliency."

Community Animator, Sally Njoroge

Sometimes, you need someone to point you in a certain direction, a direction you would not have otherwise thought of. Maiden Manzanal-Frank's talk helped us reconfigure threats as opportunities, accept rather than resent ambiguity and look inward to go beyond resilience. There is a lot to take in her words. But, the effect is awe-inspiring. If we wish to thrive in the current environment, there is no other choice but to mine opportunities strategically and set higher standards. This is "leading in crisis."
