Speaking Topics

Finding Your Dream Job

45 - 60 min session. Tailored towards the audience and their likely best fits. This is a series of steps one can take to find their true loves and make it a career.

Software Development

60 - 90 mins session for early stage entreprenuers and those that have stalled out. We look at how to solve your problems and build or hire a team to make the solution a reality.

Life and Work Balance

45-60 min session for those struggling to find a way to achieve some balance in the modern business world. Getting things done while still staying sane.

Bio

Rob is a seasoned software developer and technology professional. His background includes over 25 years of development. It includes enterprise systems on a wide variety of system architectures and platforms. His roles have included staff developer, director of development, architect, database administrator, and many points in between.
