

# **Right to a Sustainable Economy — Executive**

**Legal-policy tools to embed human rights in economic governance**

**Eréndira Ramos**

Founder & CEO, Equitable Global Futures — Keynote Speaker & Strategic Advisor (EN/ES)

# The Problem We Solve

---

- Fragmented governance creates rights risks, externalities, and costly non-compliance.
- Leaders need a coherent blueprint that aligns human rights with sustainability, finance, and audit.

# Framework: The Right to a Sustainable Economy (RSE)

---

- Legal basis and normative architecture: from international law to domestic policy coherence.
- Governance: roles for boards, ministries, regulators, and enforcement bodies.
- Metrics: align KPIs with outcomes, not just disclosures.

# Tools & Standards

---

- Human rights due diligence mapped to UNGPs/OECD; connect to assurance readiness.
- Reporting & assurance: CSRD/ISSB as levers; avoid 'paper compliance'.
- Lifecycle: policy design → implementation → monitoring → remedies.

# Policy Coherence (Sketch)

---

- One-page map: trade, finance, climate, social protection, labor, anti-corruption.
- Institutional interfaces: Treasury, Economy, Environment, Justice, AG's office.

## Case Snapshot — Public Sector

---

- Energy transition safeguards: vulnerable communities, resettlement, remedy pathways.
- Outcome: measurable risk reduction and credibility gains for the program.

## Case Snapshot — Corporate

---

- Supply-chain due diligence: salient risks, purchasing practices, grievance mechanisms.
- Outcome: audit-ready controls, fewer disruptions, credible reporting.

## How to Start (90 Days)

---

- Rapid diagnostic: governance, risk, and data gaps.
- Prioritization: high-salience risks + quick wins.
- Roadmap: controls, KPIs, and engagement plan.

# KPIs & Outcomes

---

- Rights-aligned KPIs linked to material impacts and assurance.
- Lower legal/regulatory exposure; stronger legitimacy and trust.
