Getting to the Heart of DEI and Unconscious Bias:

Beyond tick-box training, this talk gets to the root of DEI and unconscious bias - policy, practice, and connection. Yve invites leaders and teams to connect with the deeper purpose of equity, going beyond compliance to genuine and meaningful culture change.

The Power of Awareness in Business:

Awareness is the starting point for all change. In this talk, Yve explores how teams, leaders and organisations, can shift from unconscious reactions to compassionate choice. By viewing workplace culture, strategy, and leadership through the lens of awareness, businesses can unlock new levels of clarity, connection, and impact.

From Pressure to Presence in Leadership:

Modern leadership can feel like a race against time, targets, and expectations. This talk reframes leadership as an inner practice—shifting from reactive pressure to grounded presence. Yve supports leaders to regulate stress, cultivate awareness, and lead from clarity and authenticity. The result? Stronger teams, healthier cultures, and leaders who inspire trust through who they are at their root, and not just what they achieve.
